

Aaron Lewis

UX Designer | Product Designer

(614) 309-5090 | alewisdesign@gmail.com | [LinkedIn](#) | [Portfolio](#)

Summary

UX and Product Designer with 14 years of experience designing scalable enterprise systems, SaaS platforms, and employee-facing tools used in high-volume, fast-paced environments. Known for translating complex workflows into intuitive, human-centered experiences that balance user needs, operational efficiency, and business goals. A collaborative cross-functional partner with a strong foundation in systems thinking, UX strategy, interaction design, design systems, and mentoring — comfortable working across the full design lifecycle from discovery through delivery.

Experience

UX Designer II

O'Reilly Auto Parts

Aug 2023 – Present

- Own UX for core enterprise Point of Sale (POS) transactional workflows used by 60,000+ store employees nationwide, driving workflow optimization and system modernization across high-volume retail environments.
- Contribute to an enterprise-wide design system, including component libraries, accessibility standards, and voice and tone guidelines, to ensure consistency and scalability across products.
- Partner closely with Product Managers, Product Owners, BSAs, developers, and business stakeholders to simplify complex operational workflows and improve task efficiency for front-line retail teams.

UX/UI Consultant (Contract)

Learning Circle Software

Apr 2023 – Nov 2025

- Guided a B2B SaaS company through a full rebrand and product modernization, leading brand identity design, heuristic and usability analysis, and end-to-end design system development.
- Redesigned legacy software interfaces to meet modern usability and accessibility standards, improving consistency and reducing friction for end users.

UX/UI Designer

RetailStat

Jul 2022 – Jan 2023

- Led UX strategy during a VC-driven merger of six companies — defining design system architecture, information architecture, taxonomy, and rebranding direction.
- Became Design Lead mid-engagement, mentoring a junior designer and establishing a cross-functional client advocacy group across Design, Customer Success, and Marketing.

Web Designer (UI & Visual Design)

Micro Center

May 2012 – Jul 2022

- Sole designer embedded in a developer team, responsible for 35+ websites, internal web apps, and branding projects — spanning customer-facing experiences, in-store associate tools, and back-office operational systems.
- Modernized legacy business processes into streamlined web applications, reducing hours-long manual workflows to minutes through thoughtful UX redesign and hands-on front-end collaboration.
- Pioneered design thinking practices within an engineering-led team — introducing style guides, reusable UI patterns, and component-level thinking that brought consistency and scalability to a previously ad-hoc process.
- Worked side-by-side with developers from concept through build, translating wireframes and prototypes into production-ready interfaces while advocating for user needs and maintaining visual quality throughout

Skills

Design

UX/Product Design, Interaction Design, UI Design, Design Systems, Information Architecture, Wireframing, Prototyping

Research

User Research, User Journeys, Heuristic Analysis, Persona Development, Usability Testing

Collaboration

Cross-functional Partnerships, Agile Workflow, Stakeholder Communication, Developer Handoff and Collaboration

Tools

Figma, Miro, Adobe Creative Suite, HTML/CSS, Jira, AI-assisted Research

Education

Bachelor of Science in Industrial Design

The Ohio State University
